

\$5 MILLION

Grant Dollars Available for America's School Playgrounds!

Miracle's Grants for America's Schools

Miracle Recreation Equipment Company has been building playgrounds and recreation equipment for our nation's schools since 1927. Miracle Playgrounds are where children learn to socialize with each other, develop their physical and cognitive skills, learn about cause and effect, negotiate through challenges, and maybe even burn off a little energy so they can focus better in the classroom. These developmental benefits to children are the true value of play. That's why Miracle is contributing \$5 million towards our new Miracle Grants for Americas Schools program.

Get Healthy

The National Association for Sport & Physical Education (NASPE) advises that children need more than 60 minutes of active play per day. Miracle has the most attractive and intriguing playground equipment available today. Our product line clearly leads the industry in attracting and inspiring children to get up and go play, getting the physical activity so important to their development.

Free Play

Parents want the best for their children, but sometimes the "best" structured activities take away from the things children learn during the freedom of play. Children with different learning styles can learn from the wide variety of social and cognitive experiences introduced during free play, these include teaching kids how to talk to others, negotiate through difficulties, politely wait their turn, organize into teams or compete to get to the highest deck on our massive Mega Tower™ play structure.

Give your children a place to be children. Miracle will help with \$5 million in Miracle Grants for School Playgrounds. Call your local Miracle Rep today!

Miracle's Grants for America's Schools Program Features

Miracle's Grants for America's Schools is an easy way to give your kids a Miracle playground in just 3 easy steps:

1. Get a Miracle Grant application from your local Miracle representative or online at www.miracle-recreation.com/grant.
2. Your Miracle representative will walk through the design of a Miracle playground and the Miracle Grant application, including additional funding opportunities, and submit the application for you.
3. You will be notified by Miracle with an approval letter and certificate, if your project qualifies for the Miracle's Grants for America's Schools program.

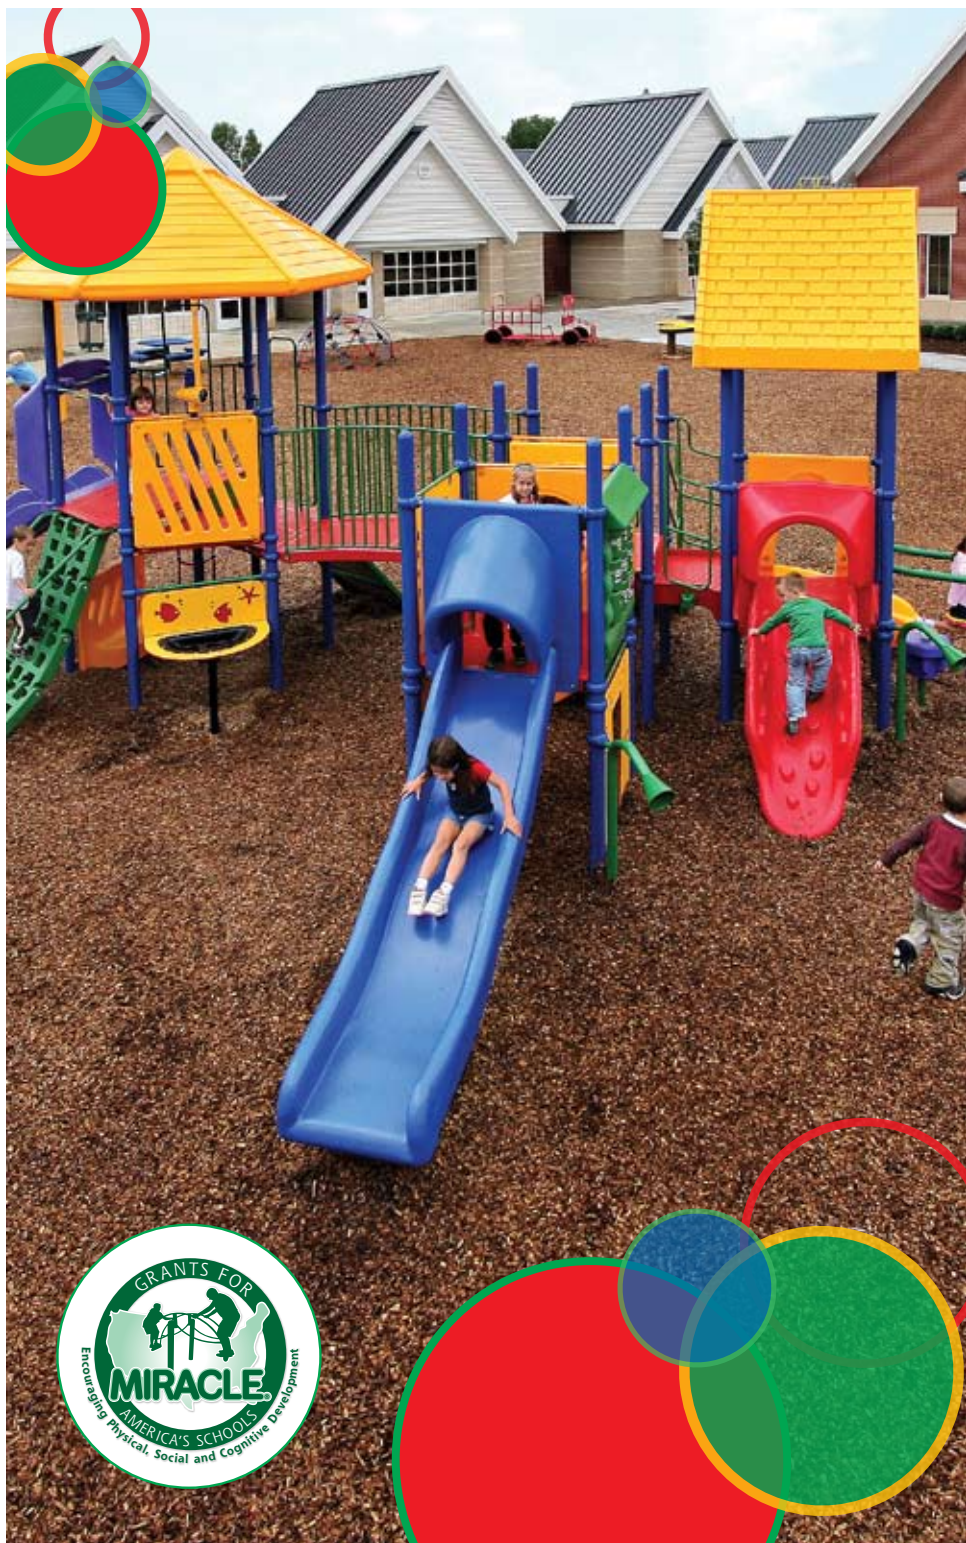

Miracle's Grants for America's Schools Program can give you:

- The opportunity to access a part of \$5,000,000 from Miracle's Grant fund based on the Grant Team's assessment of your playground proposal, grant application and local requirements.
- A Miracle playground, including installation, at your school.
- National exposure for your project with a photo on Miracle's website.

Physical, Social, and Cognitive Development

Physical Benefits

We know that children benefit physically from playing on playgrounds. But there's much more behind it than many realize. Playgrounds have to be very attractive if children are actually going to be physically active on them. With Miracle's attractiveness and stimulating designs to provide physical activity, children will continue to return to our playgrounds year after year. Examples include our:

- Mega Towers™ with 3-levels of play to climb, experience, and explore.
- Nexus modern high tech playground challenge for teens and tweens.
- The momentum found on the Multi-Pondo™, Tornado™, and Jet Ski Free Ride™.
- The theatrical platform only Center Stage® can provide.
- And thousands of custom or themed play structures with over 400 play activities.

Social Benefits

Through play, children develop and experience an early understanding of social situations. Play allows them to communicate, help regulate emotions, develop compassion, assume leadership roles and refine negotiation skills.

Social benefits are effective at all ages:

- Toddlers play side by side on our Toddler's Choice™ play systems
- 2 - 5 year olds play together in imaginary play settings they create or with a little help from our theme panels
- 5-12 year olds who like "hanging out with friends" on our rock walls and climbing nets

Cognitive Benefits

Play is how they learn scientific concepts such as the force of gravity, spatial awareness, perceptual processes, and body awareness through space. And what easier way to learn this than while playing on our Miracle slides, climbers, overhead ladders, spring riders, sign language panels, math panels and many other activities.

It's how we figure out how the world works.

- Toddlers, are repeatedly dropping toys to see how items disappear and reappear.
- 2 - 5 year olds may continually slide down our Big Timber™ slides to try to understand gravity, and begin to pretend play based on real-world experiences.
- And 5-12 year olds are challenged with how fast they can go on our 14' high, 30' long slides.

So we're making it easy with our Miracle's Grants for America's Schools! Call your local Miracle Sales Representative today and...
