PRODUCT NUMBER: APB-3J

CLOVER LEAF SANDBOX

CLOVER LEAF SANDBOX

PRODUCT NUMBER: 418-154J
FOR KIDS AGES: 2-12
PROTECTIVE AREA: 30' X 28'
SHIPPING WEIGHT: 450 LBS

"Sand play provides a child the opportunity to find objects using their sense of touch and to combine what they feel with what they see, to help them to begin to learn innumerable concepts such as round versus square or big versus little. For children who may have oversensitivity to tactile sensations, the ability to play at their own pace in their own "space" on the petals of the Clover Leaf is especially helpful, allowing a child to play near other children, without feeling threatened by the unpredictability of another child's actions. The height of the Clover Leaf is also perfect for children who use wheelchairs or who may benefit from sitting while playing, still being able to stretch and reach into the appealing feel of the sand between their fingers (or even toes!)." - Dr. Zoe Mailloux

SALE PRICE \$3,055

PULL ALONG

PRODUCT NUMBER: 632-5J
FOR KIDS AGES: 2-12
PROTECTIVE AREA: 22' X 17'
SHIPPING WEIGHT: 335 LBS

"This unique piece of equipment also supports the development of the movement and balance sense (the vestibular sensory system) by facilitating awareness and response to linear movement, in a position that is difficult to achieve on most playground equipment. In addition, the deep touch pressure along with the push-and-pull sensations involved in traversing the Pull Along also support the development and function of two other highly important senses - the sense of touch (tactile sensation) and the sense of body position (proprioception). The tactile and proprioceptive sensory systems are vital in providing the sensory feedback every child needs to guide their actions and to develop refined motor skills." - Dr. Zoe Mailloux

SALE PRICE \$2,507

TEN SPIN

PRODUCT NUMBER: 304J
FOR KIDS AGES: 2-12
PROTECTIVE AREA: 20' X 20'
SHIPPING WEIGHT: 1,000 LBS

"This piece of play equipment supports the development and function of the critical sense of movement and balance - the vestibular sense. The cocoon shaped seats are ideal, both for children who may need extra physical support, as well as for children who may benefit from extra physical boundaries to help them know where their bodies are positioned and to stay put for the ride." - Dr. Zoe Mailloux
