

# Intersection Climber

## Intersection Climber

Children can explore all sorts of ways through Intersection Climber! Two panels full of cutouts intersect to form four unique sides that children can interact with. As they move their body to fit through the shape of the large openings, they'll be building their sense of space and developing their flexibility. Smaller cutouts all around serve as hand and foot-holds for out-of-the-box thinkers, expanding their physical and cognitive skills.

## Material Specifications

**Frames:** Frames shall be comprised of 2-3/8" tube, 12 ga. and 7 ga. A-60 Galvannealed sheet, all solid welded.

**Panels:** Panels shall be constructed of Mira-Lene™.

**Support tabs:** Support tabs of 11 ga. A-60 Galvannealed sheet shall be fastened to the panels.

**All model fasteners:** All hardware shall be fastener style A.

**Finishes (unless otherwise stated):** The rungs and other steel frames and accents shall have a Mira-Cote™ finish.
